PROFESSIONAL SUMMARY

Full-Stack Software Developer with 2 years of full-time experience designing, developing, and deploying scalable web applications using the MERN stack (MongoDB, Express.js, React.js, Node.js) and Next.js. Experienced in REST API development, component-based UI architecture, state management (Redux, Context API), server-side rendering, and responsive web design. Delivered measurable Core Web Vitals improvements — INP: 177ms and CLS: 0.08 — on high-traffic systems serving lakhs of users. Proficient in Agile development, version control (Git/GitHub), Docker containerization, CI/CD pipelines (Jenkins), and cloud deployment on AWS EC2. Strong problem-solving skills with a focus on performance optimization, code quality, and cross-functional collaboration.

TECHNICAL SKILLS

Frontend Development: React.js, Next.js, Angular, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Material-UI, ShadCN UI, Redux, Context API, Responsive Web Design

Backend Development: Node.js, Express.js, REST API Development, JWT Authentication, OAuth2

Databases: MongoDB, MySQL, Database Design, CRUD Operations

DevOps & Cloud: AWS EC2, Docker, Docker Compose, Multi-stage Dockerfile, Linux, Ubuntu, Bash Scripting

CI/CD & Version Control: Jenkins (Master/Slave Architecture), Git, GitHub, Branching Strategy, Pull Requests, Webhooks

Tools & Libraries: Multer, Cloudinary, Groovy Scripting, Postman, npm

Soft Skills: Problem Solving, Teamwork, Agile Collaboration, Adaptability, Time Management, Cross-functional Communication

CERTIFICATIONS

- AWS Certified Solutions Architect – Associate | Amazon Web Services (AWS) — Issued July 31, 2026

PROFESSIONAL EXPERIENCE

Software Development Engineer | Diatoz Solutions Pvt Ltd, Bengaluru

May 2025 – Present

- Developed and maintained the RMA Ticket Management Module — a high-throughput production system handling 3,000+ active tickets with 200+ new tickets raised daily by multiple concurrent users, with support for multi-level concurrent scanning on the same ticket simultaneously; integrated REST APIs with React.js frontend using loading states, error handling, and debouncing techniques to improve reliability and user experience.
- Optimized React.js frontend performance for lakhs of concurrent users: reduced Interaction to Next Paint (INP) to 177ms and Cumulative Layout Shift (CLS) to 0.08 through debouncing, lazy loading, memory optimization, and elimination of unnecessary re-renders.
- Contributed to Flowwork.ai SaaS product by building scalable frontend modules using React.js, Next.js, JavaScript (ES6+), and component-based architecture.

Associate Software Engineer Trainee | BRR Softwares System Pvt Ltd, Bengaluru

Dec 2024 – Jan 2025

- Developed a full-stack Todo List web application using the MERN stack (MongoDB, Express.js, React.js, Node.js) with JWT-based user authentication and complete CRUD operations.
- Designed and implemented RESTful backend API modules in Node.js for a React Native CRM mobile application, enabling seamless data integration between mobile and server.

Junior Developer | Credencesoft Pvt Ltd, Bhubaneswar

- Designed and developed responsive web UI for app.theHotelmate.co and theHotelmate.co — a live hospitality and hotel booking platform serving 5,000+ customers with active daily bookings across Mumbai, Puri, and surrounding regions, using Angular, HTML, SCSS, React.js, and Material-UI.
- Built booking, reservation, and management modules for BookOne Connect, enabling end-to-end hotel reservation workflows for multiple properties.
- Developed admin dashboard and booking modules for rentifai.com using React.js with advanced search, filtering, sorting, and pagination features integrated via REST APIs.
- Collaborated with backend team on Node.js and Express.js API integration, ensuring reliable and efficient data flow between frontend and server layers.

PROJECTS

E-Learning Platform

Feb 2024 – Aug 2024

React.js · Next.js · Node.js · Express.js · MongoDB · Redux · Docker · AWS EC2 · OAuth2 · ShadCN UI · Cloudinary

- Architected and developed a full-stack e-learning web application with role-based access control for students and administrators.
- Implemented secure user authentication and authorization using JWT and OAuth2 for session management and third-party login.
- Built fully responsive frontend using React.js, ShadCN UI, Tailwind CSS, and Redux for global state management.
- Designed and developed scalable RESTful API backend with Node.js and Express.js; integrated Multer for file uploads and Cloudinary for cloud-based media storage.
- Containerized application using multi-stage Dockerfile to reduce image size and deployed on AWS EC2 with environment-based configuration.

rentifai.com – Car Rental Application

React.js · Node.js · Express.js · MongoDB · Redux · Multer

- Built a full-stack MERN web application with separate portals for Rental users and Car Owners, featuring a fully responsive UI.
- Developed RESTful backend APIs, MongoDB database schema design, and complete frontend integration for booking and fleet management.
- Implemented JWT-based authentication, role-based access, booking management, and advanced search and filter functionality.

Multi-Tier Application Deployment Automation – AWS, Terraform & Ansible

Terraform · Ansible · AWS EC2 · Nginx · Node.js · PostgreSQL · GitHub Actions (CI/CD)

- Automated end-to-end deployment of a multi-tier application on AWS using Terraform and Ansible, enabling repeatable and consistent infrastructure provisioning.
- Used Terraform to provision AWS infrastructure, including EC2 instances, networking, and security groups.
- Used Ansible to automatically configure EC2 servers and install required software, eliminating manual setup steps.
- Designed the application architecture with Nginx as the web server, Node.js as the backend, and PostgreSQL as the database, with Nginx routing incoming user requests to the Node.js backend, which communicates with PostgreSQL for data persistence.
- Set up a GitHub Actions CI/CD pipeline to automate build, test, and deployment workflows, triggering Terraform and Ansible runs on code changes for faster, reliable releases.

EDUCATION

Master of Computer Application (MCA) | Gandhi Institute for Technological Advancement

2022 – 2024

Aggregate: 83%
